

NATIONAL AVIATION ACADEMY OF THE PHILIPPINES

AEROBOTICS GUILD

INNOVATE. AUTOMATE. ELEVATE

STEP-BY-STEP APPLICATION PROCESS FOR AEROBOTICS GUILD

Based on the Constitution and By-Laws, here is a comprehensive step-by-step guide to applying for membership in the AeroBotics Guild:

PRE-APPLICATION PHASE

Step 1: Verify Eligibility

Before applying, ensure you meet the basic qualifications:

- ✓ You are a **bona fide student** of the National Aviation Academy of the Philippines - Basa-Palmayo Campus
- ✓ You have a **genuine interest** in robotics, innovation, and related fields
- ✓ You are **willing to uphold** the Constitution and By-Laws of the Guild
- ✓ You are **not currently under any academic probation** or disciplinary sanction
- ✓ You are prepared to pay the membership fee.

APPLICATION PHASE

Step 2: Submit Documentary Requirements

Prepare and submit the following documents to the Executive Board:

- Application Form (officially provided by the Guild)
- Proof of Enrollment (current school ID or registration form)

Step 3: Documentary Review

- The Executive Board will review your submitted documents

- They will verify your student status and eligibility
- You will be notified if you qualify for the next phase

EVALUATION PHASE

Step 4: Skills Assessment Examination

Take the Skills Assessment Examination, which covers:

- Foundational Knowledge in relevant fields (robotics, electronics, programming, etc.)
- Analytical and Problem-Solving Skills
- Technical Aptitude

Scoring:

- Maximum points: 100
- Passing score: 70% (70 points) minimum

Step 5: Structured Panel Interview

After passing the examination, attend a panel interview with:

- At least 2 Executive Officers
- At least 1 Committee Head
- The Faculty Adviser or authorized representative

Evaluation Criteria	
Interest and Motivation	20
Foundational Knowledge	20
Analytical and Problem-Solving Skills	20
Commitment and Availability	20
Communication Skills	20
TOTAL	100

Minimum passing score: 70% (70 points)

POST-EVALUATION PHASE

Step 6: Wait for Results

- Results will be released within 7 days from the date of your interview
- You will be notified of your admission status

Step 7: Acceptance and Appeal (if necessary)

If accepted:

- Proceed to Step 8

If not accepted:

- You may file an appeal within 3 days from receipt of results
- The decision on appeal will be final

MEMBERSHIP REGISTRATION PHASE

Step 8: Pay Membership Fee

- Pay the membership fee of ₱50.00 to the Finance and Compliance Officer
- This fee includes the issuance of your official Guild Identification Pin with embedded RFID technology

Step 9: Complete Registration

- Fill out the official membership registration form
- Provide necessary personal information for RFID system enrollment
- Sign the Data Privacy Consent Form (as per Annex B)
- Acknowledge receipt of the Guild Constitution and By-Laws

Step 10: Receive Guild ID Pin

- You will be issued your official Guild Identification Pin with RFID
- This pin serves as your official identification within the organization
- It will be used for:
 - Attendance monitoring
 - Activity participation tracking
 - Access control
 - Pointing-system purposes

INITIAL ORIENTATION PHASE

Step 11: Attend New Member Orientation

You will be required to attend an orientation covering:

- Overview of the Guild's Vision, Mission, and Objectives
- Understanding the Constitution and By-Laws
- Overview of the Ranking Systems (General and Skills-Based)
- Code of Discipline and Sanctions (Annex E)
- Code of Ethics (Annex F)
- Safety and Laboratory Protocol (Annex G)
- Introduction to Committees and Tracks
- RFID usage and Data Privacy Policy

Step 12: Skills Assessment and Track Assignment

You will undergo:

1. Initial Skills Assessment
 - Technical competence evaluation
 - Analytical ability testing

NATIONAL AVIATION ACADEMY OF THE PHILIPPINES

AEROBOTICS GUILD

INNOVATE. AUTOMATE. ELEVATE

- Creativity and innovation assessment
- Interest evaluation

- Work toward advancement in rankings (General Rank F → A; Skills Level 1 → 5)

2. Track Assignment (based on assessment results):

- Systems and Fabrication Track
- Software and Programming Track
- Research and Development Track
- Multidisciplinary Track

3. Initial Examination

- Theoretical Examination (up to 50 points)
- Practical Examination (up to 50 points)
- Results determine your starting Skill Points (SP)

4. Initial Ranking

- General Ranking: Based on points system
- Skills Ranking: Based on level of mastery (Level 1-5)

ACTIVE MEMBERSHIP PHASE

Step 13: Begin Active Participation

As an active member, you can now:

- Participate in Guild activities and programs
- Vote on matters brought before the general membership
- Access official Guild information, reports, and approved plans
- Express views and recommendations for the welfare of the Guild
- Join projects and training programs
- Participate in competitions
- Attend regular meetings and general assemblies

Step 14: Earn Points and Advance

Your participation will be tracked through:

ACTIVITY	POINTS
Attendance	2
Active Participation	5
Project Leadership	15
Competition Participation	10
Internal Awards	15
External Awards	30
Technical Output	10 - 20

General Rankings:

RANK	POINTS REQUIRED	DESCRIPTION
Rank F	0-30	Entry-Level Member
Rank D	31-69	Developing Member
Rank C	70-129	Contributing Member
Rank B	130-199	Advanced Member
Rank A	200+	Elite Member

IMPORTANT REMINDERS

Your Rights as a Member:

- Participate in Guild activities and programs
- Right to fair hearing in disciplinary cases
- Vote on matters
- Be nominated or elected to office (subject to qualifications)
- Access official Guild information
- Express views and recommendations

Your Responsibilities:

- Uphold the Constitution and By-Laws
- Support and participate in approved activities
- Observe proper conduct, discipline, and respect
- Protect the name, integrity, and property of the Guild
- Pay approved membership fees

Additional Notes:

- **Multiple Organizational Membership:** You may join other organizations, but Executive Board members cannot hold positions in other organizations
- **Reassignment:** You may request transfer between tracks upon request, performance evaluation, or recommendation by Committee Heads
- **Data Privacy:** All your data collected through RFID systems will comply with institutional data privacy policies

BENEFITS

1. Hard Skill Validation (A "Proof of Competence")

In a competitive job market, saying "I know how to program" is often not enough. The Guild gives you objective, documented proof of your skills:

- Skills-Based Ranking (Annex I):

You are officially ranked from Foundation to Expert (Levels 1-5) in specific tracks like Systems & Fabrication, Software & Programming, and R&D. You get a formal record (Skill Points/SP) that validates your actual technical competence.

- **Official Certificates (Article XIII):** All official trainings you complete come with a certificate of completion signed by the Faculty Adviser. This is a concrete addition to your resume and portfolio.

2. Structured Access to Expensive Tools and Equipment (Without the Cost)

Robotics and electronics require expensive tools, components, and software that are often out of reach for a student to buy personally.

- **Access to Resources (Annex G):** As a member, you get authorized access to the Guild's tools, equipment, and laboratory spaces for your projects.

- **Funding for Projects (Article X):** The Guild has funds. Instead of paying for all your prototype parts out of pocket, you can access Guild funds and sponsorship for approved projects, competitions, and research, significantly lowering your personal financial burden.

AEROBOTICS GUILD

INNOVATE. AUTOMATE. ELEVATE

3. A Pre-Validated "Talent Pool" for Group Projects and Competitions

A common problem in college is forming a solid team for major projects or joining external competitions. The Guild solves this for you:

- **Track Assignment (Article IV):** Members are sorted into specific tracks (Software, Fabrication, R&D, Multidisciplinary).

- **Practical Benefit:** When you need a coder for a competition, or a fabricator for a thesis prototype, you don't have to guess who is good. The Skills-Based Ranking system tells you exactly who has the verified competence to join your team. It's a built-in, reliable hiring pool.

4. A Solid Foundation for Your Thesis and Capstone Projects

Your final year thesis or capstone is one of the most stressful parts of college. The Guild directly supports this:

- **Project Framework (Article XIII):** You learn to write formal project proposals, create 3D designs, schematic diagrams, and bill of materials—the exact documents required for a good thesis.

- **Intellectual Property Protection (Annex H):** If your Guild project turns into your thesis, the Guild has clear rules on authorship and ownership (70% revenue to creators, 30% to the Guild). This protects you from having your work stolen or misused.

5. A "Performance Record" That Speaks for You (Ranking System)

Instead of relying on subjective opinions, your standing in the Guild is purely data-driven:

- **General Ranking (Annex D):** Your participation, leadership, and contributions are tracked via a transparent points system (Ranks F to A).

- **Practical Benefit:** When you apply for an officer position, a scholarship, or even ask a professor for a recommendation letter, you can point to your verified Rank (e.g., "General Rank A" or "Specialist Level") as quantifiable proof of your dedication and performance, making you stand out.

6. External Recognition and Network Building

The Guild actively functions as your agent to the outside world:

- **External Representation (Article III):** The Guild actively represents NAAP in robotics, innovation, and research events.

- **External Relations & Linkages (Article V):** The Guild has an officer dedicated to building partnerships with industry stakeholders, sponsors, and other institutions.

- **Practical Benefit:** You get direct, facilitated access to internships, sponsorships, advanced training, and networking opportunities you wouldn't have access to as an individual student.

7. Financial Transparency and Protection

You aren't just throwing money into a black hole:

- **Financial Accountability (Article X & Annex D):** The Guild has strict rules on financial reporting. Your membership fee and any money raised go to a Finance Officer who must present audited reports. This ensures your dues are actually spent on useful activities, equipment, and events.

NATIONAL AVIATION ACADEMY OF THE PHILIPPINES

AEROBOTICS GUILD

INNOVATE. AUTOMATE. ELEVATE

8. Clear Path to Leadership and Career Advancement

- **Election and Vacancy Rules (Article VIII):** The Guild has a clear, democratic process for moving up. If you show competence (via your ranks) and commitment, you have a structured path to becoming an Executive Officer.

- **Oath of Office (Annex K):** Taking on official roles is a formal, documented leadership experience you can put on your CV, complete with specific duties like managing budgets, leading teams, and handling public relations.
